

Buyer's Guide: Updating Website Content

This guide is for KNFC buyers and staff who need to update sales, announcements, staff picks, and educational content on the website.

Overview

Inventory — automatic, no action needed

Product inventory on the website is **pulled directly from the POS system via API and refreshed every hour**. Stock levels, prices, and product names are always up to date. You do not need to export, edit, or upload an inventory file.

Everything else — managed via Google Drive

Sales flyers, announcements, staff picks, and educational content come from CSV files stored in the **KNFC Website Files** folder on Google Drive. When you update those files, the website reflects the change within about 30 seconds.

At a Glance — What to Update and When

Inventory is automatic — you never need to touch it. The website pulls stock levels and prices directly from the POS system every hour.

The only files you ever edit are the four below. Each lives in the **KNFC Website Files** folder on Google Drive.

File	Controls	When to update	Columns to fill in
sales.csv	Monthly sales on the Products page	Monthly (or whenever a sale starts/ends)	Item, Sale Price, Active (yes/no)
announcements.csv	Banners on the homepage	Whenever there's news	Title, Message, Date, Active (yes/no)
highlights.csv	Staff picks on the Products page	Monthly	Item name, Description, Department, Active (yes/no)

File	Controls	When to update	Columns to fill in
education.csv	Articles in the "Learn" section	As needed	Title, Content, Category, Active (yes/no)

The golden rule: set a row's `Active` column to **no** to hide it, **yes** to show it. You never need to delete rows — just switch the flag.

How to update any file (3 steps): 1. Download the file from the Google Drive folder 2. Open in Excel or Google Sheets, make your changes, save as CSV with the **same filename** 3. In Google Drive, right-click the original file → **Manage versions** → **Upload new version**

The website reflects your changes within about 30 seconds.

Table of Contents

- 1. [At a Glance](#)
- 2. [Detailed Instructions](#)
- 3. [File Formats \(column-by-column\)](#)
- 4. [Common Tasks](#)
- 5. [Troubleshooting](#)

File Overview

File	Purpose	Update Frequency	Who updates it
~~inventory.csv~~	~~Product inventory~~	Auto-synced from POS hourly	POS system (automatic)
sales.csv	Monthly sales	Monthly	Buyers
announcements.csv	Homepage announcements	As needed	Staff
highlights.csv	Staff picks by department	Monthly	Staff
education.csv	Guides and educational content	As needed	Staff

Note: `inventory.csv` no longer exists in the Google Drive folder and does not need to be managed. The website fetches inventory data directly from the POS API.

How to Update Files

Standard workflow (for sales, announcements, highlights, education)

Step 1: Download the current file 1. Go to the KNFC Website Files folder in Google Drive 2. Right-click the file you want to update → **Download** 3. Save to your computer

Step 2: Edit the file 1. Open in Excel, Google Sheets, or any spreadsheet program 2. Make your changes — keep column headers and column order exactly as they are 3. Do not add or remove columns

Step 3: Save as CSV 1. File → Save As → choose **CSV (Comma delimited)** format 2. Use the **exact same filename** (e.g., `sales.csv`)

Step 4: Upload to Google Drive 1. Go back to the Google Drive folder 2. Right-click the **original file** → **Manage versions** → **Upload new version** 3. Select your updated CSV → **Upload**

Step 5: Verify 1. Wait 30–60 seconds 2. Visit the website and hard-refresh: - Windows: **Ctrl + Shift + R** - Mac: **Cmd + Shift + R** 3. Confirm your changes appear

Alternative: Delete and re-upload

If "Manage versions" isn't available:

- 1. Download the current file as a backup
- 2. Delete the old file from Google Drive
- 3. Upload the new file using the **exact same filename**

CSV File Formats

1. sales.csv

One row per sale item. Only rows with `Active = yes` appear on the website. Update this monthly (or whenever a sale starts or ends).

Columns (in this order):

Column	Required	Format	Example
Item	Required	Text	GT's Gingerade Kombucha 16oz
Description	Optional	Text	Member price this week only
Sale_Price	Required	Number	3.99
Regular_Price	Optional	Number	4.69
Start_Date	Optional	YYYY-MM-DD	2026-06-15

Column	Required	Format	Example
End_Date	Optional	YYYY-MM-DD	2026-06-21
Active	Required	yes or no	yes

Tips: - Add one row per sale item — there is no limit on how many active rows you can have - Set `Active` to `no` when a sale ends — no need to delete the row - `Regular_Price` is optional but useful — it lets customers see the savings - Dates are optional but help staff remember when sales started/ended

2. announcements.csv

Columns (in this order):

Column	Required	Format	Example
Title	Required	Text	Store Closure Notice
Body	Required	Text	We'll be closed on July 4th
Date	Required	YYYY-MM-DD	2026-07-04
Category	Optional	info / alert / event	alert
Active	Required	yes or no	yes

Tips: - The three most recent active announcements appear on the homepage - **Category** controls the badge colour: `info` = blue, `alert` = red, `event` = green - Set old announcements to `Active = no` to remove them

3. highlights.csv (Staff Picks)

Columns (in this order):

Column	Required	Format	Example
Title	Required	Text	Staff Pick: GT's Kombucha
Description	Required	Text	Our best-selling fermented tea
Department	Required	Text	Beverages
Recommended_By	Optional	Text	Sarah, Store Manager
Image_URL	Optional	URL	https://...
Active	Required	yes or no	yes

Tips: - Aim for one active pick per department - Set old picks to `Active = no` when replacing them

4. education.csv (Educational Content)

Columns (in this order):

Column	Required	Format	Example
Title	Required	Text	What Is Organic Certification?
Content	Required	Text	Organic certification means...
Category	Required	Text	Guide, Farm Spotlight, etc.
Author	Optional	Text	KNFC Staff
Date	Required	YYYY-MM-DD	2026-06-01
Active	Required	yes or no	yes

Tips: - Content can span multiple paragraphs — wrap the field in quotes in the CSV if it contains commas or line breaks - Set old articles to `Active = no` to archive them

Common Tasks

Update the monthly sales

1. Download `sales.csv` and open in Excel
2. Set last month's items to `Active = no`
3. Add a new row for each sale item: Item name, Description, Sale_Price, Regular_Price, dates, `Active = yes`
4. Save as CSV → upload to Google Drive via Manage versions

Post an announcement

1. Download `announcements.csv` (or create it from the template below if it doesn't exist)
2. Add a new row with your Title, Body, Date, Category, and `Active = yes`
3. Save as CSV → upload to Google Drive

Update staff picks

1. Download `highlights.csv`
2. Set the old pick for that department to `Active = no`
3. Add a new row for the new pick with `Active = yes`
4. Save as CSV → upload to Google Drive

Check the live inventory

Just visit the **Products** page on the website — the inventory is pulled from the POS system every hour. There is nothing to upload or edit.

Troubleshooting

Website shows old content after I updated a file

1. Wait 60 seconds
2. Hard-refresh: **Ctrl + Shift + R** (Windows) or **Cmd + Shift + R** (Mac)
3. Try an incognito/private browser window
4. Verify you used **Manage versions** → **Upload new version**, not uploaded a new separate file
5. Confirm the filename is exactly correct (case-sensitive, no spaces)

Content not appearing at all

- **Wrong filename:** must match exactly — `sales.csv`, not `Sales.csv` or `sales - Copy.csv`
- **Wrong folder:** file must be directly in the KNFC Website Files folder, not inside a subfolder
- **Wrong file format:** must be `.csv`, not `.xlsx`
- **Folder not public:** the Google Drive folder must be shared as "Anyone with the link can view"

Inventory looks out of date on the website

The inventory syncs from the POS every hour. If data looks stale: - Wait up to one hour for the next automatic sync - Hard-refresh the Products page - If the problem persists after an hour, contact your web developer — there may be an issue with the POS API connection

Some products missing from inventory

Products are excluded from the website display if: - Their quantity in the POS is **0 or less** (out-of-stock items are hidden by design) - Their Item Name is blank in the POS

If an in-stock item is missing, check its record in the POS system directly.

CSV formatting problems

If fields contain commas, wrap them in double-quotes:

```
"Flour, Almond",Bulk,12,8.99
```

If a field contains a quote character, double it up:

```
"Bob"s Red Mill Oats",Cereal,6,5.99
```

Best Practices

DO:

- Use **Manage versions** → **Upload new version** to replace files (never upload a second copy)
- Keep column headers and order exactly as documented
- Use consistent department names
- Test on the website after every upload
- Keep a local backup of your CSV files

DON'T:

- Don't manually edit or upload an `inventory.csv` — the POS API handles this automatically
 - Don't rename columns or change their order
 - Don't change filenames
 - Don't use commas inside numbers (`1000` , not `1,000`)
 - Don't put files in subfolders
-

File Templates

sales.csv

```
Item,Description,Sale_Price,Regular_Price,Start_Date,End_Date,Active
GT's Gingerade Kombucha 16oz,Member price this week,3.99,4.69,2026-06-15,2026-06-21,yes
Chocolove Dark Chocolate 3.2oz,,4.79,5.39,2026-06-15,2026-06-21,yes
```

announcements.csv

```
Title,Body,Date,Category,Active
Welcome>Welcome to the new KNFC website!,2026-06-01,info,yes
```

highlights.csv

```
Title,Description,Department,Recommended_By,Image_URL,Active
Staff Pick: GT's Kombucha,Our best-seller in the cooler,Beverages,Sarah,,yes
```

education.csv

Title	Content	Category	Author	Date	Active
What Is Organic?	Organic certification means...	Guide	KNFC Staff	2026-06-01	yes

Getting Help

If you encounter an issue not covered here:

- 1. Check the troubleshooting section above
- 2. Contact your web developer (Murali) with:
- 3. What you were trying to do
- 4. What happened instead
- 5. Any error messages
- 6. A screenshot if helpful
